BANK OF INDIA UGANDA LIMITED (BOIUL)

**PILLAR 3 MARKET DISCIPLINE: GUIDELINES ON
DISCLOSURE REQUIREMENTS**

AS AT 30th SEPTEMBER 2024

Resolution- Board Risk committee Agenda By circulation No 03 Dtd 19.10.2024

Board Risk Committee Agenda by circulation, recommended by the Managing Director regarding approval of the Pillar 3 market disclosure data as of 30.09.2024 of the bank and after noting the contents it was:-

Resolved that approval be and is hereby given for the approval of the pillar 3 Market Disclosure data of the bank as on 30.09.2024.

S.N	Name of Director	Designation	Signature
1	Dr. Wenceslaus Rama Makuza	Chairman (Independent Non-Executive Director)	
2	Mr. Solomon Rubondo	Independent Non-Executive Director	
3	Mr. Srikant Ashok Wikhe	Managing Director	

1.0 PILLAR III: MARKET DISCIPLINE DISCLOSURES – AS AT 30 SEPTEMBER 2024

1.1 INTRODUCTION

This document provides Pillar III: Market Discipline Disclosures for Bank of India (U) Limited (BOIUL)'s as at 30th September 2024. These disclosures in the report are based on the Bank of Uganda (BoU) regulatory requirements for all Supervised Financial Institutions (SFI's) as prescribed in the February 2023 Circular to all SFI's and were effective April 30, 2023. This is in line with the implementation of the revised Pillar III disclosure requirements issued by the Basel Committee on Banking Supervision (BCBS) in March 2017 or Basel III as amended from time to time. The Basel III Capital Adequacy Framework consists of three Complimentary pillars; Pillar I, Pillar II and Pillar III. Pillar III requires SFI's to publish a range of disclosures mainly covering Risk Management, Regulatory Capital, Leverage and Liquidity.

The aim of the Pillar III disclosure standards is to improve comparability and consistency of risk profiles through the introduction of harmonized templates. This will reduce information asymmetry and help to promote market discipline through these detailed disclosures.

These disclosures can be accessed on Bank of India (U) Limited's website www.boiuganda.co.ug Information provided in the published BOIUL's Annual Reports 2023, with cross reference to other publications (where information is available) may also serve to address Pillar III disclosure requirements.

BOIUL Pillar III disclosures for all the dates shown are based on fully applied amounts. It should be noted that Pillar III disclosures have not been audited by our external auditors.

For further inquiries and clarifications, you may contact BOIUL on the available communication channels.

1.2 OVERALL TREND OF COMPLIANCE WITH CAPITAL REQUIREMENTS

BOIUL continued to maintain adequate amounts of Core Capital over the last five Quarters (September 2023 to September 2024) in excess of the required 12.5% for Core Capital Ratio (inclusive of the minimum capital conservation buffer of 2.5%) as reflected in the figure below.

This Core Capital holding enables BOIUL to absorb most of the stress scenarios and shocks, as well as support the Bank to focus on its Strategic objectives. BOIUL has a strategy for maintaining capital levels consistent with its risk profile which considers the Strategic focus, business focus and control environment.

1.3 SUMMARY OF KEY REGULATORY METRICS

The following is the summary of the key Regulatory metrics as at September 30, 2024 relative to the minimum prudential requirements- and BOIUL was complying with all over the period.

SUMMARY OF KEY REGULATORY METRICS – AS AT 30 SEPTEMBER 2024

	Minimum	September 2024	June 2024
Core Capital (US\$ Billion)	150	163.2	161.4
Total Risk-Weighted Assets - RWA (US\$ Billion)	N/A	267.9	254.3
Core Capital Ratio –Minimum 10%	12.5%	60.9%	63.5%
Basel III Leverage Coverage Ratio	6%	29.7%	31.8%
Liquidity Coverage Ratio - LCR	100%	508.2%	405.4%
Net Stable funding Ratio – NSFR	100%	318.4%	327.6%

2.0 DIS01: KEY PRUDENTIAL METRICS – AS AT 30 SEPTEMBER 2024

No.	(Figures in US\$ 'Billions')	Sep 2024	Jun 2024	Mar 2024	Dec 2023	Sep 2023
Available Capital						
1	Core Capital (Tier I Capital)	163.2	161.4	140.2	132.6	129.8
2	Supplementary Capital (Tier II Capital)	2.0	2.1	2.0	2.0	1.7
3	Total Capital	165.2	163.4	142.2	134.5	131.5
Risk-Weighted Assets (RWA)						
4	Total Risk-Weighted Assets (RWA)	267.9	254.3	250.4	240.3	227.8
Risk-based Capital ratios as a percentage of RWA						
5	Core Capital ratio - minimum 10%	60.9%	63.5%	56.0%	55.2%	57.0%
6	Total Capital ratio - minimum 12%	61.7%	64.3%	56.8%	56.0%	57.7%
Additional Capital buffer requirements as a percentage of RWA						
7	Capital conservation buffer requirement as per BoU (minimum 2.5%)	2.5%	2.5%	2.5%	2.5%	2.5%
8	Countercyclical buffer requirement as per BoU	-	-	-	-	-
9	Systemic risk buffer requirement as per BoU (for D-SIBs)	-	-	-	-	-
10	Total of Bank's specific capital buffer requirements as per BoU	2.5%	2.5%	2.5%	2.5%	2.5%
11	Core Capital available after meeting the Bank's minimum capital requirements as per BoU	58.4%	61.0%	53.5%	52.7%	54.5%
Basel III Leverage Ratio						
13	Total Basel III Leverage Ratio exposure measure	549.1	508.1	488.6	482.3	457.4
14	Basel III Leverage Ratio (= no.1/no. 13 - minimum 6%)	29.7%	31.8%	28.7%	27.5%	28.4%
Liquidity Coverage Ratio (LCR) (3-month average)						
15	Total High-Quality Liquid Assets (HQLA)	78.5	64.3	48.4	51.7	71.1
16	Total Net Cash Outflows	15.4	15.9	12.2	13.1	12.0
17	LCR – minimum 100%	508.2%	405.4%	395.6%	394.2%	593.2%
Net Stable Funding Ratio (NSFR)						
18	Total Available Stable Funding	284.3.5	287.5	268.7	272.1	268.4
19	Total Required Stable Funding	89.3	87.8	86.4	85.4	96.1
20	NSFR – minimum 100%	318.4%	327.6%	311.1%	318.8	279.2

2.1 LIQUIDITY RISK

This section includes items subject to the liquidity risk exposures, including the liquidity coverage ratio (LCR) and the net stable funding ratio (NSFR). The LCR provides the bank with a metric to assist it in ensuring that it holds a sufficient quantity of highly liquid assets to enable it withstand a short-term (30 days) bank-specific stress situation which coincides with a period of general market stress. The NSFR requires the bank to have sufficient available stable funding (ASF) to meet the required stable funding (RSF) over one year.

2.1.1 Liquidity Coverage Ratio (LCR)

In the DIS01 table above, the LCR disclosed as a 3-month average value per quarter. The total of the high-quality liquid assets (row No. 15) increased in the third quarter (Q3) compared to the previous quarter (Q2) of 2024. However, the total net cash outflows (row No. 16) slightly decreased in the third quarter of 2024 as compared to the previous quarter. The changes resulted in a higher LCR in Q3 2024 at 508.2%, than in Q2 2024 at 405.4%, both of which were significantly above the regulatory required minimum ratio of 100% and risk tolerances defined internally.

2.1.2 Net stable Funding Ratio (NSFR)

In the DIS01 table above, the NSFR is disclosed as a quarter-end data as at 30 September 2024 and 30 June 2024. The total available stable funding items (row No. 18) decreased in the third quarter compared to the previous quarter of 2024, primarily driven by decrease in fixed deposits from our Corporate customers and demand/current deposits from our retail and small business customers. In contrast, the total required stable funding (row No. 19) practically increased over the same period due to increases in performing loans and HQLA (row No. 15) despite basically unchanged maturity profiles of both on- and off-balance sheet exposures. The changes resulted in a lower NSFR as at 30 September 2024 of 318.4% compared to 327.6% as at 30 June 2024; both of which were significantly above the regulatory required minimum ratio of 100% and risk tolerances defined internally.

3.0 DIS02: RISK MANAGEMENT APPROACH

Risk Management constitutes an integral part of the bank's business framework. The overview approach to Risk Management Framework is catered for in the internal bank policies which are reviewed regularly. This is disclosed in the Annual Audited books of the bank. Key areas included are comment on Risk Management-Risk Management Framework and risk tolerance limits; Risk Governance, channels to communicate, presentation and enforcement of the risk culture-Risk Culture, scope and main features of risk measurement systems-Risk tolerance; process of risk information reporting, qualitative information on stress testing-Capital Planning and Liquidity Contingency Plan, risk reporting; and strategies and processes to manage, capture and mitigate risk- Risk Management Framework and the three lines of defence. When done right, Risk Management does play a pivotal role in the Bank. When done properly, it

can add value across so many different areas. From customer acquisition, to client acquisition, operational risk, fraud risk, cyber risk. Basically every part of the Bank.

4.0 DIS03: OVERVIEW OF RISK-WEIGHTED ASSETS (RWA) – AS AT 30 SEPTEMBER 2024

4.1 APPROACH TO MEASURING RISK-WEIGHTED ASSETS

The Bank's risk weighted assets for deriving the regulatory capital are calculated according to the Basel III framework, as required by the Bank of Uganda (BoU). Below follows an overview of the approaches used for the main risk categories to derive the required capital:

- **Credit risk** (defined as the risk of loss of principal or loss of a financial reward stemming from the borrower's failure to repay a loan or otherwise meet a contractual obligation (default)) including non-counterparty risk but excluding counterparty credit risk): To calculate the required capital for credit risk, the bank uses the standardised approach subject to BoU regulatory standard haircuts.
- **Non-counterparty-related risk** (defined as loss in value on bank premises or equipment): The bank applies prescribed BoU regulatory risk weights to calculate the required capital.
- **Counterparty credit risk** (defined as the risk of default of a counterparty before the final settlement of a derivative or securities financing transaction: The bank calculates the credit equivalents for the derivatives/securities financing to calculate the required capital for counterparty credit risk using the standardised approach for counterparty credit risk.
- **Market risk** (defined as the possibility of an investor to experience losses due to factors that affect the overall performance of the financial markets (that could arise from trading positions)): The bank calculates the capital requirements for market risks according to the model-based approach as approved by BoU. For funds held in the trading book, the required capital is calculated according the simplified approach for investments managed in managed collective assets. For default risk of fixed income trading positions as well as off-balance sheet items, the required capital is calculated according to the market risk standardised approach as defined by BoU.
- **Operational risk** (defined as risk of loss resulting from inadequate or failed internal processes, people, systems, or from external events): The bank applies the standardized approach as defined by BoU.

4.2 OVERVIEW OF RISK-WEIGHTED ASSETS (RWA)

The following table provides an overview of the Risk-weighted assets (RWA) and the related minimum capital requirement by risk type. Capital requirements presented in the table are calculated based on capital of 12% (as required by BoU) as at 30 September 2024.

As seen from the table DIS03, the explanation given for the movement between reporting period 30 September 2024 and 30 June 2024: increase in RWA was primarily due to higher credit risk RWA due to increase on Term Loans (No.1) and Guarantees, Unused Overdrafts and Letters of credit lending (part of

the key lending products offered by the Bank); partially offset by a decrease in treasury portfolio trading positions (as evidenced by net short positions of UGX 6.1 billion as at 30 September 2024).

DIS03: OVERVIEW OF RISK-WEIGHTED ASSETS – AS AT 30 SEPTEMBER 2024

N o.			Sep 2024	Jun 2024	Sep 2024
		(Figures in US\$ 'Billions')	RWA	RWA	Minimum Capital Requirement
1		Credit Risk (excluding Counterparty Credit Risk (CCR)) - <i>Standardised approach</i>	244.8	235.0	29.4
2		Counterparty Credit risk - <i>standardised approach (CCR)</i>	0.0	0.0	0.0
3		Market Risk - <i>Standardised approach</i>	6.1	2.9	0.7
4		Operational Risk - <i>Standardised approach</i>	17.0	16.4	2.0
5		Total (1+2+3+4)	267.9	227.4	32.1

5.0 DIS04: COMPOSITION OF REGULATORY CAPITAL – AS AT 30 SEPTEMBER 2024

No. ²	Figures in US\$ 'Billions')	Sep 2024 ¹
Common Equity Tier 1 Capital (T1): Instruments and reserves		
1	Permanent Shareholders Equity (issued and fully paid-up capital in form of common shares, fully eligible)	150.0
2	Share Premium	0.0
3	Retained earnings (prior years' retained profits)	8.9
4	Net after-tax profits current year-to-date(50% only)	6.5
5	General reserves (permanent, unencumbered and able to absorb losses)	0.0
6	Common Equity Tier 1 Capital (T1) before regulatory adjustments³	165.4
Regulatory adjustments to Common Equity Tier 1 Capital (T1)		
8	Good will and other intangible assets (net of related deferred tax liabilities)	0.0
9	Current year's losses	0.0
10	Investments in unconsolidated financial subsidiaries	0.0
12	Deficiencies in provisions for losses (gains or losses due to changes in own credit risk)	0.0

13	Other deductions determined by the Central bank (e.g. prohibited loans to insiders, etc.) ⁴	0.0
14	Deferred tax assets (e.g. planned dividend for the financial year that rely on future profitability)	2.2
15	Total regulatory adjustments to Common Equity Tier 1 Capital	2.2
16	Net Tier 1 Capital (T1)	163.2
Tier 2 Capital: Supplementary Capital (T2)		
17	Revaluation reserves on fixed assets	0.0
18	Unencumbered general provisions for losses (not to exceed 1.25% of RWA)	2.0
19	Hybrid capital instruments	0.0
20	Subordinated term debt (not to exceed 50% of Core Capital; subject to a discount factor)	0.0
21	Tier 2 Capital (T2)	2.0
22	Total Regulatory Capital (=Tier 1 (T1) + Tier 2 (T2))	165.2
23	Total Risk-weighted assets (RWA)	267.9
Capital Adequacy Ratios and Buffers		
24	Tier 1 Capital (No. 16 as a percentage of risk-weighted assets)	60.9%
25	Tier 2 Capital (No. 22 as a percentage of risk-weighted assets)	61.7%
26	Total institution-specific buffer requirement (capital conservation buffer plus countercyclical buffer requirements plus systemic buffer as a percentage of risk-weighted assets)	2.5%
27	<i>of which capital conservation buffer requirement</i>	2.5%
28	<i>of which countercyclical capital buffer requirement</i>	0.0%
29	<i>of which bank specific systemic risk buffer requirement</i>	0.0%
30	Tier 2 Capital available to meet the buffer requirements, after deduction of T1 to cover the bank's minimum capital requirements (as a percentage of risk-weighted assets)	49.2%
Minimum statutory ratio requirements		
31	Tier 1 Capital Adequacy Ratio	10.0%
32	Tier 2 Capital Adequacy Ratio	12.0%

Notes

1. For reconciliation of bank regulatory capital amounts, the figures used for the calculation of regulatory capital adequacy amounts are identical to the annual published balance sheet positions (which have been referenced where relevant to display all components that are disclosed in the table as shown in under 'DIS04: Composition of Regulatory Capital).
2. Row numbers are assigned according to the sample table as supplied by BoU-the regulator.
3. Capital before Regulatory adjustments refers to capital before deduction of ineligible non-controlling interests and other deductions that the regulator requires to be excluded from Tier 1 Capital.
4. Other intangible assets are net of deferred tax liabilities.

6.0 DIS05: CREDIT QUALITY OF ASSETS – AS AT 30 SEPTEMBER 2024

6.1 CREDIT RISK

This section includes items subject to the Bank of Uganda (BoU)/regulatory credit risk framework under the Standardized Approach. The BoU categories loans and advances and debt securities as referred to in table DIS05 and DIS06 are shown in accordance with BoU requirements. The net value of BoU category loans and advances comprises the following IFRS balances to the extent that they are subject to the credit risk framework: Loans, unused overdrafts and other financial assets designated at fair (excluding non-loan positions) values. The net values of BoU category debt securities includes the following positions: Bonds, money market instruments, and other fixed-income securities included within financial assets measured at FVOCI and financial assets measured at amortised cost plus debt securities in financial assets measured at FVTPL allocated to the credit risk framework. The section 'Credit risk' is structured into two subsections:

6.1.1 Credit Quality of Assets

This subsection includes information on the Bank's credit risk exposures and credit quality of assets. Additional quantitative disclosures related to credit quality of assets with breakdowns of exposures by sectors, and residual maturity are disclosed separately in reports to the regulator and are outside the scope of this disclosure.

6.1.2 Changes in Stock of Defaulted Loans and Debt Securities

This subsection provides a qualitative reference to disclosure on defaulted loans evaluation and management. This is through credit risk management, i.e. techniques employed to reduce credit risk for loans and securities (collateral evaluation and management, information about credit risk concentrations and credit risk mitigation instruments used by the clients). The disclosure gives the scope of 'past due' and impaired loans used for accounting purposes and any differences with respect to 'past due' and 'defaulted' (Expected Credit Losses (ECL)) for regulatory purposes. The extent of past due exposures (more than 90 days) that are not considered to be impaired (ECL stage allocation) and methods used for impairments have reasons given in accompanying notes to published Annual financial statements. This subsection also includes ageing analysis of accounting past due exposures.

Any credit facility requiring restructuring is assessed on an individual basis and individual provisions are booked if required. The main goal of such restructuring actions is to avoid the client's default and to minimize the loss potential for the Bank. Typical terms and conditions offered in case of restructuring may be postponed payments of interest or principal, adjusted interest rates or the modification of the repayment schedule. Any facility which is in a restructuring process is classified as impaired and provisions are made to cover foregone interest and potential losses. Special conditions granted to clients without need to preserve them from default are not considered as restructuring measures.

6.1.3 Credit risk under the Standardized Approach

The Standardised Approach allows (if possible) banks to use risk-based assessments prepared by External Credit Assessment Institutions (ECAI) or export credit agencies to determine the risk weight for certain counterparties according to the BoU/regulator defined exposure segments. This subsection includes

information on the use of External Credit Assessment Institutions (ECAI) to determine the risk weightings applied to related counterparties.

The tables DIS05 and DIS06 below provide a breakdown of defaulted and non-defaulted loans, debt securities, and off-balance sheet exposures.

7.0 DIS05: CREDIT QUALITY OF ASSETS – AS AT 30 SEPTEMBER 2024

No	Figures in UShs 'Billions')	September 2024					
		a	b	d	e	f	g
		Gross carrying values		Value adjustments /Provisions as per FIA 2004		Interest in suspense	Net Values (FIA 2004)
	Exposure classes	Defaulted exposures	Non-defaulted exposures	Specific	General	suspense	(a+b-d-e)
1	Loans and advances (excluding debt securities)	1.6	201.3	0.8	2.0	0.1	200.1
2	Debt securities	0	0	0	0	0	0
3	Off-balance sheet exposures	0	0	0	0	0	0
4	Total	1.6	201.3	0.8	2.0	0.1	200.1

As at 30 September 2024, the non-defaulted exposures amounted to Uganda Shillings (UShs) 201.3 Billion which was equivalent to 99.2% of the gross exposures, reflecting relatively good and stable credit asset quality in the post COVID-19 business environment.

8.0 DIS06: CHANGES IN STOCK OF DEFAULTED LOANS AND DEBIT SECURITIES – AS AT 30 SEPTEMBER 2024

No.	Figures in UShs 'Billions')	Sep 2024	Jun 2024
1	Defaulted loans & advances, debt securities and off-balance sheet exposures at end of the previous reporting period	1.3	1.3
2	Loans and debt securities that have defaulted since the last reporting period	1.6	0
3	Returned to no-defaulted status	1.3	0
4	Amounts written-off	0	0
5	Other changes (recoveries)	0	0
6	Defaulted loans & advances, debt securities and off-balance sheet exposures at end of the reporting period (1+2-3-4+5)	1.6	1.3

The defaulted exposures position as at 30 September 2024 did not change significantly as seen from table DIS06 above. This was because the top defaulted exposure returned to normality during the quarter ended 30 September 2024 resulting in a very good credit quality during the quarter.

9.0 DIS07: QUALITATIVE DISCLOSURE ON FI's USE OF EXTERNAL CREDIT RATINGS UNDER THE STANDARDISED APPROACH FOR CREDIT RISK – AS AT 30 SEPTEMBER 2024

The bank is not currently using any External Credit Assessment Institution (ECAI) for credit risk assessment under the Standardised Approach for Credit risk until the regulator recommends the list of vetted companies acceptable to do the job. However, internally, the credit rating score for "Unrated" is used in the meantime to close the gap.
